

Fauzan Putra Sanjaya

Depok | [LinkedIn](#) | [Github](#) | +6281297312440 | sanjaya@ristek.cs.ui.ac.id | fauzansanjaya.dev

Driven Information Systems undergraduate (GPA 3.71/4.00) with a strong foundation in scalable Software Engineering, System Architecture, and Quality Assurance. Proven track record of designing high-concurrency enterprise applications and implementing robust CI/CD pipelines. Adept at utilizing clean code practices, asynchronous processing, and rigorous testing methodologies to ensure system reliability and performance. Highly passionate about solving complex logical problems and building enterprise-grade backend infrastructure.

EDUCATION

Universitas Indonesia

Depok, Indonesia

Bachelor's Degree : Major in Information System - GPA 3.71/4.00

2023 - 2027

- Relevant Coursework :
Artificial Intelligence & Data Science, Enterprise Application Programming, Big Data Management, IS Analysis and Design, Computer Vision, Accounting & Enterprise Information System.

WORK EXPERIENCE

EMS Paramitra

Jakarta

AI Engineer Remote

March 2026 – Present

- Spearheaded AI integration for the BankSoal platform, automating the question bank ecosystem to significantly enhance operational efficiency by OCR.
- Architected a Hybrid Search engine (OpenAI semantic embeddings & PostgreSQL fuzzy search) and an automated OCR cleaning pipeline achieving over 95% accuracy.
- Developed a scalable ML auto-classification system utilizing KNN and category centroid embeddings.

Telkom Indonesia

Jakarta

Fullstack Engineer Intern (Digital Product Division)

February 2026 – April 2026

- Engineered high-concurrency backend services for the Interactive Digital Solution Catalog, building 5 scalable applications utilizing React, NestJS, PostgreSQL.
- Implemented clean code architecture and robust infrastructure, ensuring highly reliable enterprise integrations through asynchronous processing and data caching.
- Orchestrated system observability and maintained operational excellence, applying core Site Reliability Engineering (SRE) principles to ensure system uptime.

TVRI Nasional

Jakarta

Mobile Developer - <https://play.google.com/store/apps/details?id=com.tvri.citizenjournalism&hl=en>

June 2025 – December 2025

- Engineered core features for the TVRI Citizen Journalism app (Flutter), notably developing a highly responsive, real-time chat service using WebSockets to handle concurrent user interactions.
- Managed the end-to-end continuous deployment process, ensuring strict code compliance and successful release pipelines on the Apple App Store and Google Play Store.

Techno Glow Innovation

Cikarang

Software Engineer Intern - <https://dke-ai.iziapp.id/technobsim>

July 2025 - August 2025

- Developed AI-powered services for a B2B skincare simulator, automating workflows and implementing a PubMed API pipeline to scientifically validate product claims.
- Optimized backend content generation pipelines to reduce latency, supporting a real-time product demonstration successfully featured at the CosmoBeaute 2025 exhibition

Faculty of Computer Science

Depok

Teaching Assistant of Principles of Information Systems

January 2025 – June 2025

- Selected from a competitive pool (9% acceptance rate) to mentor 200+ students, evaluate coursework, and provide actionable feedback to improve learning outcomes.

ORGANIZATION

RISTEK Fasilkom UI

Depok

Director of Mobile Development

February 2025 – Present

- Lead the full development lifecycle of 3+ mobile applications, directing cross-functional teams to implement industry-standard agile methodologies and deliver high-quality client solutions.

COMPFEST UI

Depok

Person in Charge of Sponsorship

January 2025 – December 2025

- Executed high-stakes B2B pitching and strategic negotiations, successfully securing over IDR 250 Million in funding from major tech and consulting firms (Google Cloud, NTT Data, FEHA Consulting).

MATA UI - UI Student Association in Purwakarta

Purwakarta

Vice President

2023 – 2025

- Led a 77-member organization, strategizing and executing outreach programs to 12 regional schools to inspire prospective university students.

Safehome Anara Indonesia

Depok

Web Developer & Volunteer

May 2025 - November 2025

- Contributed to the Health and Public Service sector by developing an integrated digital platform for gender-based violence (GBV) victims (Funded by European Union & DPIS UI).
- Translated critical social support requirements into functional UI/UX accessibility designs, demonstrating a strong commitment to social sustainability and community impact.

PROJECT

Emoji Inpainting & Restoration

Computer Vision Engineer

Computer Vision Project

- Architected a high-fidelity image inpainting system using Conditional GANs (Pix2Pix) and PyTorch, engineering a robust data pipeline with Stratified Group Splitting to ensure rigorous evaluation.

Cross-Platform Social Media Stance Analysis

NLP Engineer

Social Media Analytics Project

- Developed a hybrid analytical framework to process 35,000+ data points regarding government policies. Fine-tuned the IndoBERTweet transformer model to achieve an 85.90% accuracy rate in sentiment detection.

Vehicle Rental System

Fullstack Developer

Enterprise Application Programming Project

- Developed a scalable platform utilizing Java Spring Boot and AWS. Engineered an automated CI/CD pipeline using Git and Docker for seamless containerized deployments. Conducted rigorous API testing (Postman) and executed heavy performance load testing (Apache JMeter) to validate system stability and business logic.

AWARD

- Pertamina Sobat Bumi Scholarship 2025 (**Awardee**)
- Finalist of Web3 OJK & EKRAF Hackathon 2025 (**Project Lead**)
2nd Winner of Hackathon Hacksphere Powered by KAI and President University 2025 (**Fullstack Developer**)
- 1st Winner of Business Case Competition Brawijaya Dialogue Nexgen 2025 (**Business Analyst**)
- Finalist Software Development ITFest IPB University 2025 (**Mobile Developer**)

SKILLS & COMPETENCIES

Hard Skills: React, Vue.js, Python, SQL, Flutter, Dart, Java, Spring Boot, PyTorch, Computer Vision (GANs, Pix2Pix, U-Net), NLP (Transformers, IndoBERTweet), REST API, Pandas, Git, Data Analysis, Automated Testing (Selenium), API Testing (Postman), Unit Testing (JUnit), Performance Testing (JMeter), CI/CD Pipelines, Docker, AWS Deployment, WebSockets, Firebase, XCode Deployment, Google Play Store Deployment.

Languages: English (Fluent - LBI EPT 560; EF SET C1) | Bahasa Indonesia (Native - UKBI 711 Highly Proficient).

Certifications: 4x Google Cloud (Vision API, NLP, Speech, BigQuery Predictive Analytics) | HackerRank (Software Engineer Intern, SQL) | Kaggle (Machine Learning, Computer Vision) | DataCamp (Python, AI Engineer in Devs).
